Career Objectives

Seeking a Data Engineer position where I can build a strong foundation in Python, SQL, and data engineering tools such as Spark and Airflow, while contributing to building scalable data pipelines and supporting data-driven decisions. I am eager to learn, grow, and continuously improve my technical and problem-solving skills within a professional environment.

Education

Kafrelsheikh University 2022 - 2026
Bachelors of Artificial Intelligence GPA: 3.4
Relevant Coursework: Data Structures, Algorithms, Distributed Systems, OOP, OS, Networks, Databases, ML, Big Data Analysis, Cloud.

Technical Experience

Data Engineer Remote
DigitalH May 2026 - Present

- Design and develop scalable ETL/ELT data pipelines using AWS Glue, PySpark, and Python.
- Build and maintain AWS Glue Jobs to ingest, transform, and optimize large-scale datasets stored in Amazon S3.
- Collaborate with the data engineering team to deliver reliable, scalable, and production-ready workflows for enterprise projects.

Big Data Trainee Hybrid
Orange Digital Center Egypt Aug 2024 - Sep 2024

- Created reproducible environments with Docker and utilized Hadoop for distributed large-scale data management.
- Implemented in-memory big data processing with Spark and built efficient data warehousing solutions on Hadoop using Hive.
- Automated data flows with Apache NiFi and managing structured data in PostgreSQL, handling document-based in MongoDB.

Data Engineer Trainee Hybrid
Digital Egypt Pioneers Initiative Jun 2024 - Sep 2024

- Developed and implemented ETL processes using SSIS.
- Gained insights into data warehousing concepts, including architecture, Implementation and data Modeling.
- Developed and implemented ETL processes using SQL Server Integration Services (SSIS).

Microsoft Power BI Specialist Remote
Digital Egypt Pioneers Initiative Jun 2025 - Dec 2025

- Collected, cleaned, and modeled data from multiple sources using Power BI, DAX, and Power Query.
- Designed and published interactive dashboards and reports to support data-driven decision-making.
- Applied data governance and visualization best practices while completing a real-world capstone project.

Selected Projects

Tower Health Stream ([GitHub](#))

Real-Time Telecom Network Intelligence Pipeline

- Built a real-time data pipeline processing ~7M+ events/hour from 10K+ telecom towers using Apache Kafka and Flink.
- Implemented anomaly detection, data quality validation, and weather-based enrichment with sub-150ms latency.
- Designed an end-to-end pipeline covering stream processing, batch analytics (Airflow & dbt), and Grafana dashboards.
- Technologies: Apache Kafka, Apache Flink, Apache Iceberg, Apache Airflow, dbt, DuckDB, PostgreSQL, Grafana, Docker, Python.

Airflow Pyspark ETL Pipeline ([GitHub](#))

Scalable Log Processing & Analytics Pipeline

- Built an automated ETL pipeline processing 10M+ web server access logs using Apache Airflow and PySpark.
- Implemented data quality validation, hostname enrichment, and automated analytics generation with 93% data compression.
- Designed modular DAG workflows for parsing, enrichment, cleaning, and reporting stages with automatic file detection.
- Technologies: Apache Airflow, PySpark, PostgreSQL, Docker, Parquet, Python.

Scalable Airflow Social ETL ([GitHub](#))

Data Pipelines and Orchestration

- Developed a scalable ETL pipeline to collect and process social media data from X and YouTube.
- Orchestrated data workflows with Apache Airflow in Docker, storing structured data in a PostgreSQL database.
- Designed schema scripts and implemented API collectors for posts, videos, and engagement metrics.
- Technologies: Docker, Apache Airflow, PostgreSQL, Python, REST APIs, Git, Bash.

Skills

Data Engineering: ETL/ELT Pipelines, Data Warehousing, Batch & Stream Processing.
Big Data Technologies: Apache Spark, Apache Flink, Apache Kafka, Apache Airflow, Apache Iceberg, dbt, Hadoop, Hive.
Databases: PostgreSQL, MySQL, SQL Server, DuckDB, SQL, Data Modeling.
Programming: Python, SQL, C++, Bash.
Technologies: Docker, Linux, Git, GitHub, Microsoft Azure, Microsoft Fabric.

Certifications

Fabric Data Engineer Associate Microsoft Jun 21, 2025
Docker from zero to hero Udemy May 8, 2025
Databases and SQL Coursera Jun 1, 2023
